printshop®
FOR MAC *Version 2*

Network Installation
Instructions

OVERVIEW

You can use **The Print Shop** not only as a standalone application but also with server technologies. There are different ways of using The Print Shop on a network:

- You can install **The Print Shop** on each computer in your lab, and then save any files that are created to users' home folders stored on a server.

OR

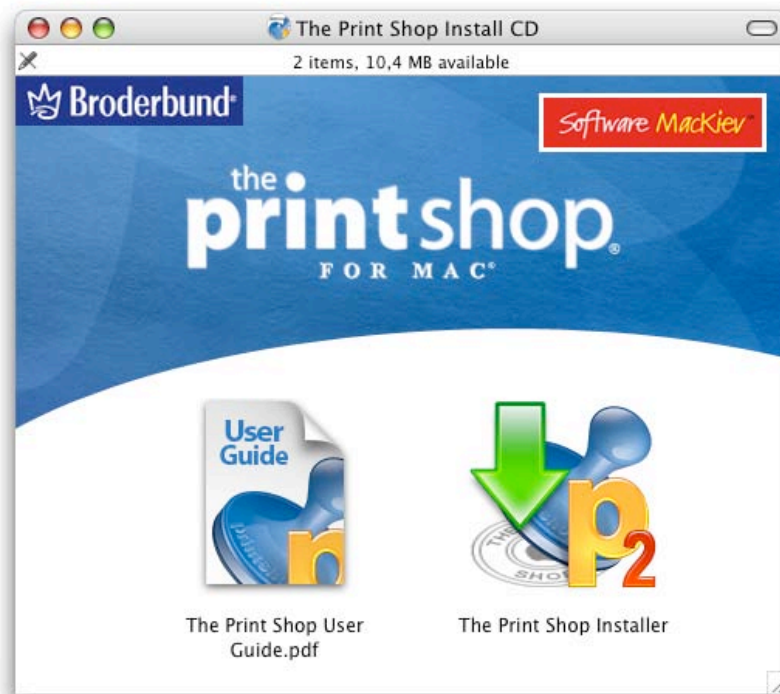

- You can use the product from a Mac OS X network server, also saving any files that are created to users' home folders stored on the server. However, in this case it would also be a good idea to limit the number of simultaneous clients.

IMPORTANT NOTE: It is strongly recommended that each user have his or her own folder on the server and save the files there.

INSTALLATION INSTRUCTIONS

To install the application on a server:

1. Insert the Install CD in the drive. The CD window appears.

2. Double-click **The Print Shop Installer** icon to launch the installer, and then click the **Continue** button on the first installer screen.

3. On the second installer screen, select the **Install Art CD Contents** checkbox to install the Art CD content, and then click **Continue**.

4. A series of screens appears asking whether you want to install additional options. Choose the options you want to install and click **Continue**.
5. Insert the Art CD when the following message appears and click the **Continue** button.

6. Wait until installation is complete. **The Print Shop** application is installed in the main **Applications** folder.
7. Move the application to any shared location on the server by dragging it in the Finder.
8. Copy the **Spotlight importer** to the client computers manually. Its location is **Library/Spotlight/The Print Shop.mdimporter**.

Note: Only Mac OS X 10.4 users can take advantage of the new Tiger search technology.
