

**NEW**  
**Universal Edition!**

**The Most Popular Creativity Program in Schools Is Now More Powerful than Ever!**

**GRADES  
K-8**

**iLife Integration and iPod Export!**

Only Kid Pix Deluxe 3X has iLife® integration: Import pictures of your classroom directly from iPhoto® to use as backgrounds, add songs from iTunes® playlists or import songs created in GarageBand™, and then export your animated pictures and slide shows to iMovie® or iPod® video format.

**Dozens of real world creative tools.**

This Kid Pix gets kids started with their first real-world creativity tools. There's paint so real they'll think they can touch it, plus pencils, markers, crayon, chalk, stamps, animations, text blocks, wacky brushes, mixer effects, sound effects, and more!

**Much larger drawing area!**

There's more than three times the drawing area in Kid Pix Deluxe 3X than in any other version of Kid Pix on Apple's largest displays. We spent two years remaking the art so that it could grow to full screen and still look spectacular.

**IT & teacher-friendly preferences and extras.**

There's an options to skip the Kid Pix opening song and Kid Pix login screen. You can save files anywhere – even on remote servers. Equally friendly for network or stand-alone use. Gentle coaching mode. Politically-correct fire hose screen eraser replaces the "bomb". Create flip-book animations...and more!

**A most award winning Kid Pix edition!**

We have been so pleased and honored that Software MacKiev's edition of Kid Pix has won so many accolades:
